

## THE ADAS WORKSHOP 30 September–1 October 2008

Forschungszentrum Jülich, GERMANY

We enclose some information about this year's ADAS workshop. The workshop will be held on the campus of Forschungszentrum Jülich, in west Germany.

We do hope it is suitable for most people. As usual, the workshop will incorporate a meeting of the steering committee. The retirement celebration of Dr Albrecht Pospieszczyk will take place, at the same venue, on the afternoon before the workshop.

**TIME AND PLACE:** The ADAS Workshop meeting will be held at the Institut für Energieforschung – Plasmaphysik, Forschungszentrum Jülich, Germany on 30th September and 1st October, 2008. It is anticipated that participants will arrive on the afternoon of Monday 29th September and that the meeting will finish on the evening of Wednesday 1st October. The meeting room will be also be available on the Thursday morning. Participants will be issued with a badge permitting entry to FZJ for all days.

**ACCOMMODATION:** Thirty-two hotel rooms have been reserved in the town of Jülich and daily transport from the hotels to the meeting will be provided. Alternative accommodation is available in nearby Aachen but transport from there to the workshop will not be provided.

**COSTS:** There is no registration fee for the workshop. The hotel costs are €67/€92 (Kaiserhof) or €57/€88 (Hexenturm) per night for a single/double room. Lunch will be provided on both days of the meeting. Dinner will be provided on Tuesday evening, while participants are free on the Wednesday. Hotel costs for ADAS Project steering committee members will be paid by the ADAS Project although if it is possible to be covered by your laboratory, it would help ADAS finances. Other participants will need to pay their own way.

**TRAVEL:** Participants will need to cover their own travel costs to the meeting. Details on how to get to Jülich can be found at [http://www.fz-juelich.de/portal/about\\_us/reach\\_us](http://www.fz-juelich.de/portal/about_us/reach_us). The nearest airports are Düsseldorf (DUS) and Köln (CGN). Public transport from the airport to Jülich requires a change of train and takes about 2 hours at a cost of order €22–36 return. The journey by taxi from either airport takes around 45 minutes and expect to pay €100–120 per taxi. Look out for fellow participants at the airport.

**MEETING AGENDA:** A tentative agenda is circulated with this information. This should be considered a first draft and we expect the agenda to change between now and the meeting so if there is something you would like to present then please let us know and we will try to accommodate you.

**PROCEEDINGS:** The workshop is an informal meeting, which traditionally does not publish its proceedings. Many people like to present material which is not yet ready for a wider audience. However we offer the opportunity to make the talks available on the ADAS website. This is completely at the discretion of the presenter.

**POSTERS:** Boards will be provided in the venue but there is *no* formal poster session. If you would like to display some work just bring it along.

**REGISTRATION:** We need to make definite bookings early, so please either fax the registration slip, or email the requested information, to Martin O'Mullane at the details given below as soon as possible. Late registrations will still be possible but hotel places in Jülich may not be available.

**WEBSITE:** Full information about the workshop will be posted on the ADAS website at <http://www.adas.ac.uk/workshop2008.php> but any important information regarding details will also be e-mailed.

ENQUIRIES: The workshop is organized jointly by the University of Strathclyde and the Forschungszentrum Jülich. Correspondence and general organization will be handled by:

Martin O'Mullane,  
UKAEA Fusion,  
Culham Science Centre,  
Abingdon, Oxon,  
OX14 3EA,
